

Extended Topics Showcase: Logic Gates, Relational Models, Big Data

This document demonstrates the diagram system on three new domains:

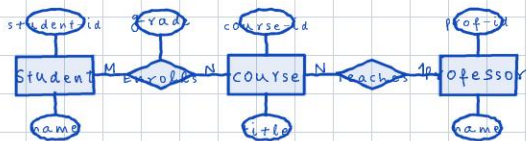

logic gates, relational models / databases, and big-data / distributed systems.

Every diagram is generated from the DRAW primitive engine.

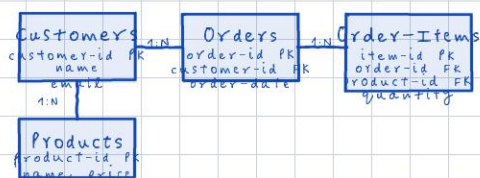

1. AND Gate

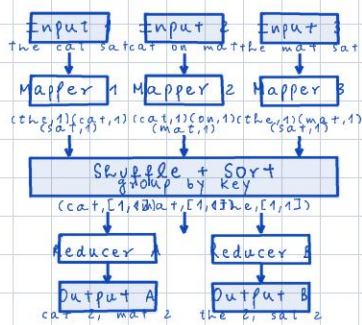

2. University ER Diagram

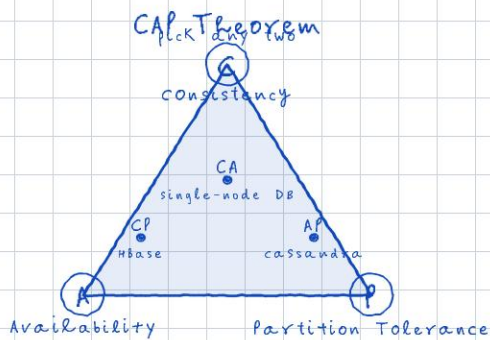

3. Relational Schema (E-commerce)

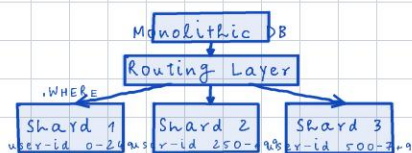

4. MapReduce Word Count

5. CAP Theorem

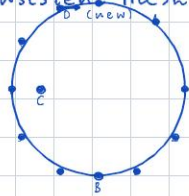

6. Database Sharding

7. Consistent Hashing

Consistent Hashing

Adding node D: only key 8 remaps (A $\rightarrow$ D)
Keys 1-4 stay on B, keys 5-6 stay on C, key 7 stays on A
